

Start Compliant. Stay Compliant.

Automating your core infrastructure while remaining compliant with complex Federal and industry regulations is a daunting task. **SIMP** provides a fully automated and extensively tested framework that provides turn-key core services and regulatory compliance. By incorporating scalability, flexibility, and compliance principles, **SIMP** can be tailored to meet your business and security requirements. **SIMP** currently supports the following regulations:

- ✓ NIST 800-53
- ✓ DISA STIG
- ✓ SCAP Security Guides

SIMP automates the protection of critical IT assets against internal and external threats, failed audits, and operational downtime. Built on a suite of proven Open Source components, **SIMP** delivers:

- ✓ Turn-key Infrastructure
- ✓ Extensive Testing
- ✓ Remediation Automation
- ✓ Modular Flexibility
- ✓ Isolated Environment Support

SIMP supports the following Operating Systems*:

Red Hat Enterprise Linux 6

Red Hat Enterprise Linux 7

CentOS 6

CentOS 7

* Windows support is currently in development.

SIMP is Open Source Software freely available under the Apache 2 license on GitHub.
